# Advent of Code

Day Eight

LucidBrot

August 2020

## 1 Introduction

We had 34 Strawberries for this year's harvest. Probably not enough. So we are sad now and solve https://adventofcode.com/2019/day/8.

    000000100001220022
    hello world 3
    Image Width: 3        Image Height: 2
    I want to loop 6 times for the first layer.
    The input file contains 18 characters.

    Char Char Binks: 0
Advanced currentlayerzerocount to 1
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.    Char Char Binks: 0
Advanced currentlayerzerocount to 2
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.    Char Char Binks: 0
Advanced currentlayerzerocount to 3
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.    Char Char Binks: 0
Advanced currentlayerzerocount to 4
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.    Char Char Binks: 0
Advanced currentlayerzerocount to 5
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.    Char Char Binks: 0
Advanced currentlayerzerocount to 6
    The current char 0 does not equal 0. It is macro:-¿"getchar ["fileline ]–"digitctr "whereas 0 is the character 0.
Found a new best layer (0) with zerocount 6.

Best Layer Zero Count is 6 for layer 0. Advanced currentlayer to 1
Found a new best layer (1) with zerocount 0.
Best Layer Zero Count is 0 for layer 1. Advanced currentlayer to 2
Current Layer (2) with zerocount 0 is worse than Best Layer (1, zerocount 0).
Best Layer Zero Count is 0 for layer 1. Advanced currentlayer to 3
Current Layer (3) with zerocount 0 is worse than Best Layer (1, zerocount 0).
Best Layer Zero Count is 0 for layer 1. Advanced currentlayer to 4
Current Layer (4) with zerocount 0 is worse than Best Layer (1, zerocount 0).
Best Layer Zero Count is 0 for layer 1. Advanced currentlayer to 5
Current Layer (5) with zerocount 0 is worse than Best Layer (1, zerocount 0).
Best Layer Zero Count is 0 for layer 1. Advanced currentlayer to 6

The current layer is now 6
